

The Island collection built-in cabinets for use in the hygiene area in the bathroom unite sleek elegance with timeless practicality to create a serene sense of order and sophisticated simplicity. The interior of this cabinet responds to your storage needs and features an interior light that is activated when the door is opened (12 V/DC transformer not included).

The built-in horizontal cabinets are available in the same stunning range of finishes as the other products to ensure complete harmony in the bathroom space: the distinctive Silver finish is uniquely refined, the neutral Greige is elegant and discreet, and the Nero finish adds a bold, contemporary touch of understated sophistication.
