20 **BAIA** bathroom in Shagreen Matt Gold and Greige finish

ARMANI / CASA
Roca

The aesthetic of the *Baia* bathroom collection intentionally references the déco taste, brought up to date by the incorporation of avant-garde technology. Particular attention was paid to the ergonomics of each piece, where the exquisite sense of well-being is magnified through the use of the enveloping curved volumes and shapes softly flowing, inspired by water, evoked by the name of the collection itself. The result is a versatile bathroom collection that is both contemporary and timeless, in accordance with the Giorgio Armani's philosophy.

WELLNESS

Bathtubs were carefully designed to easily unwind and relax, a key element always present in all available versions (from the retro-look freestanding to built-in options, with or without soft-air massage and water chromotherapy). Marked by a high level of ergonomics and comfort, bathtubs absolutely stand out for the research of their materials and finishes particularly pleasant and smooth to the touch: a trait that the Armani taste values a lot, and that was hence transposed from fashion to living environments. Another element coming from the world of fashion is the made-to-measure approach for the shower trays: the possibility to choose among several options of size and colors that leave space to personal preferences in line with the refined elegance for which Armani is famous for.
